

!!NEW 2018 CONTROL ALL 8 CHANNELS ON YOUR IPAD!!

4 / 6 / 8 / CHANNEL COMPACT POWERFUL RELIABLE WIRELESS Control Unit

Wireless Ipad Control / Client

Wireless Ipad Control / Engineer

The DSP428W2 is able to control 8 separate zones with 4 separate inputs: 4 in 8 out. a fully flexible Wireless DSP controller!
 DSP428W2 has all the usual Features. Compression, Parametric EQ, Graphic EQ, Crossover, Fully Flexible routing, Gain input /output controls, Mute, Phase switching/ Set to Zero Options on Parametric and Graphic EQ's,
 Great for a Venue with limited storage space with multiple speakers and zone requirements. Can input 2 separate stereo signals same time(example: iphone and PC Audio) Or run 4 separate input audio signals sent to any or all of the 8 outputs. Very Flexible. DSP428W2 can be controlled Wirelessly with its own private network, up to 100 ft away(unobstructed) which means....one can tune the system or adjust all parameters/volumes etc on the fly, whilst walking the Venue via your ipad wirelessly!
